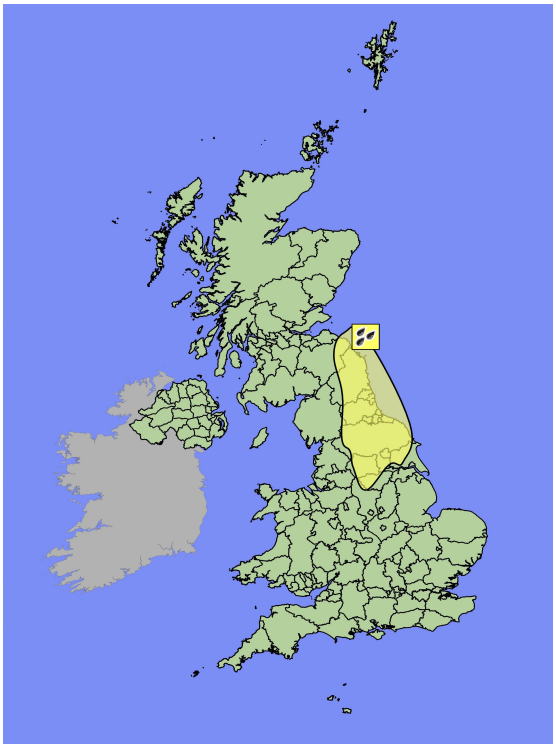
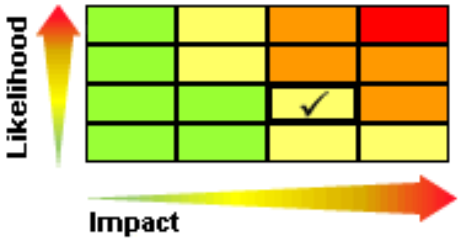
National Severe Weather Warning Service





Chief Forecasters Assessment
The remnants of Monday's rainfall will still be affecting similar areas early on Tuesday, with further impacts likely, but an improvement in terms of rainfall at least during the morning. Impacts from flooding may, of course, last longer.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **00:05 on Tue, 27th Nov 2012** until **05:00 on Tue, 27th Nov 2012**

Rain will persist into the early hours of Tuesday in northeast England and the extreme southeast of Scotland. The rain should steadily become less heavy, and the more persistent rain will subsequently die out, leaving only scattered showers for the rest of Tuesday.

The public should be aware of the continued risk of flooding, since this rain comes on top of that which will have fallen on Monday.
